Personal Summary

I have strong technical skills as well as excellent interpersonal skills, enabling me to interact with a wide range of clients. I am eager to be challenged to grow and further improve my skills. I have a clear, logical mind with a practical approach to problem-solving and a drive to see things through to completion. I am eager to learn. I enjoy overcoming challenges.

Employment History

- **Dell Limerick**, Raheen Business Park, Raheen, Limerick ⇨ July 2017 – Present.
  ⇨ Planning, Supply Chain - Senior Analyst & Software Developer at Dell

  - **Aim**: First IT Graduate hire in the supply chain team in limerick to start automating many different processes while also owning the fixed workstations supportability and covering a colleague with over 20 years of knowledge in his role.
  - **Conclusion**: I was promoted 1 year into my employment which was unusual for a graduate. I was part of the core team for the Limerick RPA Club in which we received an Innovation award. Automation hour's savings targets were smashed each year while using multiple different tools and languages.

  Projects

  - Build to Supply Leadtime (BTS LT).
    - **Aim**: Take over BTS Leadtime process and automate, which takes 4.5hrs to run. Process 4 Hours Daily - Improved Process – 15mins Daily.
    - **Conclusion**: Improved Process & Automated Process which only takes 15mins to run.
    - **Languages / Tools Used**: VB & Advanced VBA Scripting
  - Call the ball (CTB).
    - **Aim**: Create an interface for multiple users to upload data to so the main user can pull all data.
    - **Conclusion**: Application created for the main user to view the data each user uploaded.
    - **Languages / Tools Used**: HTML, CSS, JS, ASP.NET, C#, SQL, NET, TOAD.
  - Consumer weekly Material Production Planner (MPP) Automation
    - **Aim**: Help reduce workload for a colleague as the process took 3 hours weekly to run.
    - **Conclusion**: Learned process and added value by improving the process. Run time now only 2 mins resulting in an automation saving 3hrs while also eliminating human error.
    - **Languages / Tools Used:** VBA

- **Dell Limerick**, Raheen Business Park, Raheen, Limerick March 2016 – September 2016.
  ⇨ Global Channel Aging Inventory - Channel Inventory Analytics improvement.

  - **Aim**: Create an application to calculate the number of days from when inventory is sent to customers whether it's 0-30 days, 30-60 and, 60-90 days. Once it hit a certain number of days depending on the product it would give an alert to the finance team so they could jump in and then try to offer the customer the product at a cheaper price to help them sell the product.
  - **Conclusion**: This saved dell millions as it reduced the stock been returned to dell and it also saved space in the warehouses as most of these returned products would be left sit as they would be classed as outdated technology.
  - **Languages / Tools Used**: SQL, PHP, Visual Basic, JavaScript, Teradata, Toad, Visual Studio, MySQL, phpMyAdmin.

- **JTECH Team**, Ballylanders, Limerick ⇨ Jan 2020 – Present.
  ⇨ Freelancer – Web Developer / IT

  Projects

  - Smart-brain-api
    - **Aim**: Create a fully responsive react application which allows user to register, sign in & sign out. Add face detection to show a red box surrounding a face from an image URL.
    - **Conclusion**: React Application connected to PostgreSQL Database using Clarifai API for the face detection function and Heroku to deploy the application and host it live on the internet.
    - **Languages / Tools Used**: React JS, Node JS, Express JS, PostgreSQL Database, Nodemon, ES, jQuery, Ajax, HTML5, CSS, Bootstraps, CSS Grid, JavaScript, Git, GitHub, Redux, Tachyons, Heroku, Knex, Cors, Clarifai API, NPM
    - **Application URL:** https://smart-brain-96.herokuapp.com/
    - **Code URL:** https://github.com/James96kelly/smart-brain-api
      https://github.com/James96kelly/smart-brain
  - MyRoboFriends
    - **Aim**: Create a responsive JavaScript application with an interactive search box searching through data.
    - **Conclusion**: Data filtered out in real-time displaying in a nice responsive way.
    - **Languages / Tools Used**: React JS, Node JS, Express JS, HTML5, CSS, Bootstraps, CSS Grid, JavaScript, Git, GitHub, Redux, NPM, tachyons, JavaScript.
    - **Application URL:** https://james96kelly.github.io/myrobofriends/
    - **Code URL:** https://github.com/James96kelly/myrobofriends
  - Robotman
    - **Aim**: Create an interactive robot where body parts can move once hovered over.
    - **Conclusion**: By using CSS tricks the robot's hands, legs, and head move once hovered over.
    - **Languages / Tools Used:** HTML / CSS-Grid
    - **Application URL:** https://james96kelly.github.io/robotman/
    - **Code URL:** https://github.com/James96kelly/robotman
  - Background-generator
    - **Aim**: Create a web application to set, display and show color code of background color.
    - **Conclusion:** Interactive web page displaying the colors selected and showing color code
    - **Languages / Tools Used:** HTML / JavaScript / CSS
    - **Application URL:** https://james96kelly.github.io/background-generator/
    - **Code URL:** https://github.com/James96kelly/background-generator
